

STC-SSL

Stone crushers with a max working depth and grinding diameter of 15 cm for skid steer loaders between 80 and 100 HP equipped with a high flow kit.

Standard equipment: 125 cc hydraulic piston motor with double relief valve with anticavitation and brake function, adjustable hardox-counterblade, inner hydraulic dosing hood with adjustable cylinder for better output material regulation, soil penetration skids, working pressure control gauge, hydraulic hoses.

Options: diverter valve.
